

iMAR SERIES

IdentiQuik® Multiple Antenna RF-enabled communicator (MAR)

provides a convenient and economical solution for avoiding misconnections in a multiline environment. Designed to handle up to eight fluid connections, the MAR eliminates larger, individual RF-enabled communicators, which reduces redundancy and complexity of system design. Like all IdentiQuik RF-enabled products, the MAR makes controlling, protecting and streamlining fluid handling processes easier and more efficient. The MAR is compatible with all PLC12 panel-mounted bodies and PLC12 Series RFID-enabled inserts.

FEATURES

Palm-sized reader with one USB supporting up to eight fluid lines

Transfer of fluid and information for each flow path

Modular, detachable configurations per fluid line

BENEFITS

Simplifies design integration by eliminating larger, individual RF-enabled communicators

Identifies device types or connected media, verifies line connection and captures fluid and product data

Meets specifications for cables, coupling type, length, size and environment
