## **Colder Products Company Announces New Genderless Sterile Connectors for Single-Use Bioprocessing**

**St. Paul, Minn. – Apr. 23, 2012 – [Colder Products Company](http://www.colder.com)**, the leader in the design and manufacture of single-use connection technology and connectors for the life sciences markets, is unveiling genderless single-use **[AseptiQuik® G Connectors](#)** at **[INTERPHEX 2013](#)** (Booth #3326) at the Javits Center in New York. The new connectors enable quick and easy interchangeable sterile connections for transferring valuable media, even in non-sterile environments. Colder experts will be available to show event attendees how they can easily incorporate the new connection technology into their systems.

“The development of our new AseptiQuik G builds upon the market acceptance of our small format genderless S series by providing higher-flow solutions to support a wider range of applications,” said John Boehm, business unit manager, bioprocessing markets. “Our innovative design reduces connection and system complexity, and the robust construction provides reliable performance and enhanced user confidence.”

The easy-to-use genderless design of AseptiQuik G connectors allows universal mating between any G series connector without the need for clamps or fixtures, resulting in simplified systems integration and increased process flexibility for biopharmaceutical manufacturers.

Offered in gamma and high-temperature versions, the new G series connectors provide a full range of interchangeable flow solutions including 1/4-inch hose barb, 3/8-inch hose barb, 1/2-inch hose barb, 3/4-inch hose barb and 3/4-inch sanitary. Colder's bioprocessing connections are manufactured in an ISO Class 7 certified cleanroom and meet USP Class VI material standards.

AseptiQuik G Connectors are a new addition to Colder's family of sterile connectors that include sterile connect and disconnect solutions. Available in a full range of 1/8- to 1-inch flow configurations, the connectors provide ease-of-use, robust construction and reliable performance for transferring valuable media for a wide range of applications including single-use bag and tubing assemblies, cell banking systems, bioreactors, mixers, sampling and filling.

To learn more about how to benefit from the new AseptiQuik G Connectors or other Colder single-use bioprocessing solutions, visit [www.colder.com/bio](http://www.colder.com/bio). For information on any of the other 10,000 Colder connection solutions, please visit [www.colder.com](http://www.colder.com) or call 800-444-2474.
