## **Colder Products Company Expands Fittings Product Line**

*Wider offering supports customers worldwide with fluid management solutions*

**St. Paul, Minn. – Jan. 29, 2008** – Colder Products Company has announced the addition of more than [100 new fittings](#) to its current product offering of quick disconnect couplings and fittings. The expanded offering adds larger hose barb sizes, more material options and tube-to-tube reducers to its existing fitting line.

“We’ve added these products to meet our customers’ requests for high-quality fittings for their applications,” said Jim Brown, medical business unit manager, Colder Products Company. “This product line expansion is a terrific complement to the [more than 7,000 different quick disconnect couplings and fittings](#) we already provide.”

Available in both white nylon and animal-free, natural polypropylene, these high-quality fittings have parting line-free, instrumentation-quality hose barbs. Colder fittings feature tapered 10-32 threads to aid in sealing, and a unique shrouded 1/16” hose barb to prevent breakage of polypropylene hose barbs, making them an ideal choice for both medical and instrumentation applications.

[Colder Products Company](#), a world leader in the design and manufacture of quick disconnect couplings, will debut the expanded fittings line and other new products at [MD&M West](#) (Booth # 2115) at the Anaheim Convention Center in

(more)

California, Jan. 29 to 31, 2008. Attendees will have the opportunity to meet with Colder experts and discuss the company's new high-quality fitting options for fluid handling needs.
