Colder Products Company Introduces Its Smallest, Non-Spill Quick Disconnect Couplings

*NS2 Couplings Deliver Cost-Efficient, High-Flow Fluid Line Transfer in a Small
Footprint, Safely and Economically*

St. Paul, MN – January 15, 2007 – A new line of compact, non-spill quick disconnect couplings from Colder Products Company provides users with fast, safe and virtually leak-free fluid line connections. An excellent choice for printing and ink management, analytical instrumentation, electronic cooling, and many other applications, the patent-pending NS2 couplings provide high-flow fluid transfer in a small footprint.

"This NS2 Series of quick disconnect couplings builds on our industry leading platform of non-spill valves and reflects our commitment and ongoing investment in easy-to-use, high quality couplings," said Andy Hass, business unit manager, industrial markets, Colder Products Company. "For applications that require the safe transfer of fluids, the NS2 offers an easy, twist-to-connect locking mechanism and double-sided non-spill shutoff valves for added safety and convenience."

The NS2 meets the need for smaller, more cost-effective industrial couplings. The smaller couplings can replace larger ones, offering users a low-cost, space-saving option for a wide variety of coupling applications. The new couplings also offer very low air inclusion – air induced into the coupling upon connection – minimizing contaminants and reducing the need to purge fluid lines.

(more)

Colder NS2 Series quick disconnect couplings offer hose barb terminations and are available for tubing in 1/8" (3.2mm) and 1/4" (6.4mm) ID. Configurations include pipe thread, in-line and panel mount. The ferruleless compression terminations connect to 1/4" OD (6.4mm) and 0.17" ID (4.3mm) semi-rigid tubing. Pressure ranges from vacuum to 45 psi (3.1 bar), and operating temperatures range from 32° F (0° C) to 120° F (49° C).

For more information about available options and order quantities, please contact the Colder Products Company inside sales department at 651-645-0091 or 800-444-2474.
